SEO COVERAGE

+38%

CTA CONVERSION

25-35

DAYS TO LAUNCH

Most websites are a **liability**.

Template-based websites load slowly, lack SEO foundations, and don't convert visitors. Meanwhile, leads that do convert get lost because there's no system to route them forward into sales.

Problem 01

Speed kills visibility

Search engines deprioritize slow sites. Organic traffic stalls while competitors climb rankings.

Problem 02

Visitors bounce early

Generic layouts give no reason to stay. 50% of mobile visitors leave before the page loads.

Problem 03

Leads get lost

Forms don't route to CRM. Leads sit unactioned. Sales teams miss opportunities.

Problem 04

No AI integration

Visitors leave with unanswered questions. AI chat and automation bolted on as afterthoughts.

THE AGENCY DISCONNECT

Most web agencies build nice-looking sites that are slow underneath. They hand off the codebase, say "good luck," and disappear. You're left maintaining something that depreciates every month.

The website as a performance asset.

We don't build websites - we build growth infrastructure. Every component is engineered for speed, search, and conversions. The result is a website that actively drives traffic and revenue instead of sitting in the background.

Service 01

High-Performance Frontend

Modern Next.js architecture engineered for sub-second load times and flawless mobile performance.

- Next.js & TypeScript codebase
- Core Web Vitals optimization
- Global CDN delivery

Service 02

Technical SEO Foundation

SEO built from the ground up so visibility compounds with every new page published.

- Full SEO audits & fixes
- Schema & sitemap setup
- Information architecture

Service 03

Conversion UX & AI Integration

Conversion-focused design and on-page AI that turns traffic into qualified leads.

- AI chat integration
- CTA & form optimization
- A/B testing framework

Service 04

CRM & Automation

Leads automatically routed to your CRM and sales systems. No manual work, no lost leads.

- CRM integrations
- Lead automation workflows
- API-first architecture

The Collide Advantage.

Most agencies build static websites. We engineer growth infrastructure. Speed, search visibility, and conversions are built in from day one - not bolted on later.

CAPABILITY	COLLIDE SOLUTIONS	TRADITIONAL AGENCY	IN-HOUSE BUILD
Built for speed from start	✓ Engineered in	Often bolted on later	Depends on team
Time to live website	25-35 days	60-90+ days	Months
Technical SEO foundation	✓ Built-in	Add-on cost	Rarely done well
AI integrations included	✓ Standard	Extra cost, later	Custom build
CRM automation	✓ At launch	Manual setup	Depends on you
Direct access to team	✓ Always	Through PM	N/A

Transparent Pricing

Clear tiers, month-to-month flexibility. No hidden fees or surprise scope changes.

No Vendor Lock-in

Your codebase is yours. Built on open standards, portable anytime.

Month-to-month flexibility.

TIER 1

Starter

₹25,000/mo

Fast foundation. 5 core pages. Technical SEO baseline.

- 5 core pages built
- Next.js frontend
- SEO foundation
- Basic CMS setup
