

AUTOMATION FOR EVERY TEAM

Automation Infrastructure.

One connected system for tasks, approval workflows, document processing and team collaboration - built around how your team actually works, with the repetitive parts running on their own.

87%

MANUAL WORK
REDUCED

15 Mins

APPROVAL CYCLES

5-7x

FASTER EXECUTION

30-45

DAYS TO DEPLOY

Manual workflows don't scale.

Every day your team spends hours on tasks that follow a predictable pattern. Approvals wait for someone to check their email. Documents get lost between systems. Emails get forwarded back and forth.

CHALLENGE 01

Approval bottlenecks

Decisions stack up waiting for someone to review and approve. Meanwhile, projects stall and deadlines slip.

CHALLENGE 02

Data stuck in silos

Information lives in email, spreadsheets, and messaging apps. Nobody knows the single source of truth.

CHALLENGE 03

Manual handoffs

Work gets passed between people and systems by hand. Every handoff is a chance for errors and delays.

THE IMPACT

Teams spend 40-60% of their time on work that doesn't create value. The real cost isn't just time lost - it's missed deadlines, unhappy employees, and growth that never happens.

WHAT TEAMS LOSE

40-60 hrs

per week on manual work

3-7 days

average approval cycle time

Majority

of errors from manual entry

2-3 months

time to implement new workflow

One strategy required.

Email, spreadsheets, and messaging apps all doing different jobs. What's needed is one system that can handle the full workflow from task creation to approval to handoff to completion. That's what Collide builds.

Surface 01

Task Execution

Unified task management with automatic routing, status tracking, deadline enforcement, and team collaboration.

Auto-assign · Deadline alerts · Progress tracking

Surface 02

Approval Engine

Conditional approval workflows that route decisions to the right people automatically based on business rules.

Smart routing · Multi-level approvals · Auto-escalation

Surface 03

Document Processing

Auto-extract, validate, and route documents through your workflows without manual steps or data entry.

OCR extraction · Validation · Auto-routing

BUILT FOR SCALE

Handle any volume from 100 tasks to 100,000 per month without performance degradation. Supports unlimited concurrent users.

SECURITY FIRST

Enterprise-grade encryption, audit trails, role-based access control, and compliance ready for SOC 2 & ISO.

THE COLLIDE ADVANTAGE

Pre-built integrations with Salesforce, HubSpot, Slack, and 500+ tools. Custom workflows built and deployed in 30 days. Continuous AI optimization that learns from your patterns and improves over time without extra configuration.

Real-time alerts

Know when tasks are due

Full audit log

Track every action & change

Custom fields

Match your exact workflow

Mobile app

Approve on the go

Integrated systems, not point solutions.

Every workflow connects to your existing tools. Tasks trigger approvals. Approvals trigger document processing. Documents trigger notifications. One system orchestrates everything without custom coding or complex integrations.

Service Architecture

- ▶ Task queuing & intelligent prioritization
- ▶ AI-powered routing & smart assignment
- ▶ Multi-level approval decision engine
- ▶ Document extraction & validation
- ▶ Real-time notification & escalation
- ▶ Complete audit trail & compliance
- ▶ Custom workflow orchestration

Tech Stack

- ▶ Claude AI for intelligent routing
- ▶ Webhook integrations for your stack
- ▶ Real-time event processing engine
- ▶ Encrypted data storage & backups
- ▶ REST API for custom workflows
- ▶ Dashboard with real-time analytics
- ▶ Scalable infrastructure that grows

INTEGRATION PARTNERS

Works with Salesforce, HubSpot, Slack, Microsoft Teams, Google Workspace, Zapier, Jira, Asana, Monday.com, Notion, Airtable, and 500+ business tools.

Instant Sync

Changes propagate instantly across all connected systems

Zero Code

Build complex workflows without programming knowledge

Always On

99.9% uptime SLA with automatic failover

Smart Workflows

Use conditional logic, loops, and variables to handle complex business processes

API First

Full REST API allows direct integration with custom applications & systems

The Collide Advantage.

Most workflow tools are rigid point solutions. They handle one type of workflow well, then break when you need something different. Collide is built for flexibility.

CAPABILITY	COLLIDE	TRADITIONAL WORKFLOW TOOLS	CUSTOM BUILD
AI-powered routing	Native	Not available	Custom build required
Multi-step workflows	Unlimited	Limited flexibility	Fully flexible
Integration speed	Days	Weeks	Months
Cost	Predictable	Varies	Expensive
Ongoing maintenance	Managed by Collide	You maintain	You maintain

- 01

Speed to value

Working system in 30-45 days, not months.
- 02

Flexibility first

Handle any workflow pattern without custom coding.
- 03

AI optimization

System learns from your workflows and improves over time.
- 04

Full integration

Works with your existing stack, not against it.
- 05

Compliance built in

Audit trails, access controls, and encryption standard.
- 06

Direct access

Talk to our team, not account managers.

Transparent tiers. Month-to-month flexibility.

TIER 1

Starter

29,000

Small teams, single workflow, up to 500 tasks/month.

- ▶ One workflow execution pipeline
- ▶ Up to 3 approval levels
- ▶ Basic integrations (5 tools)
- ▶ Email notifications
- ▶ Monthly reporting

★ MOST POPULAR

Growth

79,000

Growing teams, multi-workflow, up to 2000 tasks/month.

- ▶ Unlimited workflow pipelines
- ▶ Advanced approval workflows
- ▶ Full API access
- ▶ Document processing
- ▶ AI-powered routing
- ▶ Custom webhooks
- ▶ Weekly check-ins

TIER 3

Scale

Custom

Enterprise, custom workflows, unlimited scale.

- ▶ Unlimited everything
- ▶ Priority support
- ▶ Dedicated success manager
- ▶ Custom integrations
- ▶ Advanced analytics
- ▶ SLA guarantee
